Strengthening Partnerships To Improve Student Health Outcomes

The entire staff at Bigfork school recently completed their training in the lifesaving skills of CPR/AED/First Aid. Skills testing day on August 26 was made possible with the support of our Logan Health American Heart Association Training Center (Mari Anderson and Lindsey Tufly) as well as support from Wendy Hansen, Amanda Willis, and Alyssa Grekoff.

“We are pleased that we had grant support for this endeavor and our staff is prepared to support health related emergencies at school.”

Jennifer Knopik, Bigfork School Nurse

Our School Based Health Center student advisory wellness committee met in early September to discuss goals for the upcoming school year and plan activities for suicide awareness month.
